Preface

Exit the Matrix is not the only source of its kind. As a matter of fact, a few of the others are included in this book. There are thousands of us out here, each influencing our own pods. Together, we move as one.

My initial purpose was to gather elements of the emerging parallel conservative economy and put it in one place for my busy friends to use. "The List" has also morphed into a collection of calls to action in addition to being a shopping resource. This guide will set those who are unfamiliar, on the path to sovereignty. This guide is also for the group of people who have moved past the complaining-about-the-world phase and are ready to move on to the get-things-done phase. The first edition of Exit the Matrix was released prior to the Bud Light boycott of 2023, which is one example of what we can accomplish, and I hope we were just getting our feet wet!

I scour social media, podcasts, websites, newsletters, and attend events to obtain every single resource. I create accounts to browse and send email inquiries, digging into each one and report back on it just for you. This resource is being continuously audited, amended, and added to for quality and relevance. The July 2025 Edition was audited and updated in its entirety, but know the most relevant information can be found directly on the site listed.

No one is paying me to put anything you see in here, and I work solo. The only one who put me up to this is the man upstairs. **Please see the last page of the book to support this work**, which currently are just referral codes like what you'd send to your friends. I may try affiliate links in the future to help support this endeavor, which I've been avoiding because it's important to me for you to know that everything I've added to this book is genuine. I promise that will never change.

All resources can be used/printed/shared freely! However, credit is mine. Find the link to this pdf at the websites in bold below. Please use discernment and share responsibly - I suggest making sure any person you share this with is a conservative Patriot and/or Christian who loves and serves God and country. Please note that each entry's religious or political affiliation is explicitly stated unless dictated by common sense, and some entries have no affiliation but still serve the purposes of this book.

I understand that we all hold slightly varying views on politics and religion even as Christians and Patriots, so unlike the Bible, please pick and choose what suits your needs and feel free to disregard the rest!

Prologue

For many of us, in 2020-22, the curtain that was hiding Oz fell down, and we saw him for what he really is. When corporations openly hate you, when schools openly indoctrinate your kids, when the government openly poisons you through the food supply, when mass protests are ok during a global pandemic but going to work is not, when the government forces you to choose between your medical freedom and your job, when churches and schools are shut down but strip clubs and liquor stores are open, it dawns on you that maybe we shouldn't ask the government for permission to live. Maybe instead we should rely more on ourselves. It can feel overwhelming at first. Enter parallel economy.

Shop local. Shop small. Stop letting big tech sell your data, or deciding what you can see on the internet. Just say no to government propaganda and watch independent news. Feed your family real food without gene-altering & lab-grown substances. Find doctors who aren't Big Pharma pill pushers. Skills for sustenance, self-defense, parallel economics, spiritual healing, political awakening, and optimal performance are all necessary components of living free and toppling threats to liberty.

2 Chronicles 7:14 KJV "If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

Manual

How to use this book & notes about this edition.

The first edition of Exit the Matrix was released in January 2023. Between that first edition and this one, I've added 140 pages over the course of seven updated editions, released every few months. Until then, I hadn't gone through each and every resource and audited them. It was definitely time to do so, because outdated information is useless, and your time is precious! **Every single resource in this book was evaluated and updated between May-July 2025 for maximum utility.** Even so, things do change at the speed of light, so take a look at the website for the most current info.

Sometimes the entries are listed in order of importance or well-roundedness in my opinion, and sometimes the websites are simply in the order in which I found them. Lastly, similar websites are grouped together and as they grow, they form their own subsections, and finally their own pages.

An asterisk () at the beginning of an entry denotes a new addition to this edition, for those of you who want to look at every update, so you don't have to read everything to find what's new. I will typically release a new edition in December/January, and again sometime from May through August, when I'm not busy homeschooling my kiddos.

Please note that several times I will reference a chapter as a "page", because in the first couple editions of Exit the Matrix, they were just pages, not chapters, and it stuck!

At any time, you may visit the telegram page t.me/ExitTheMatrixWWGM and tap the pinned posts, or LinkTr.ee/WomanInAWorldGoneMad to get the free pdf link to the previous edition of this book. The most up-to-date edition will be for sale on Amazon. (Trust me, I did so many hours of research trying to avoid Amazon.) **This September 2025 Edition pdf link is TinyURL.com/ExitTheMatrixSept2025.** Open the pdf so you can tap or click on the hyperlinks instead of retyping them.

Whether it's underlined or not, every single web address is a hyperlink embedded in the pdf. All of the YouTube channels given are hyperlinks as well. Any reference links that may be in jeopardy of deletion due to their content, have been saved at Archive.org. When trying to visit a link, if it will not open, do one or all of the following: make sure cache & cookies are cleared, use Private Browsing mode, and/or a VPN. I don't know why this happens. I believe it's censorship. "They" will put whatever obstacles in your way to discourage you. Instead, let it fuel your fire!

Food: Local, Small-Farm, Made in USA

These alternatives combined with farmer's markets, buying direct from butchers & farmers, and the other businesses listed throughout this book, are nearly able to replace trips to the grocery chains, which increasingly only sell vaccinated meat, tumors grown in a lab sold as "fake meat", pesticide-drenched GMO produce, and at some point in the future we are sure will require you have a compliant social credit score to purchase.

WAPF is an international membership nonprofit dedicated to restoring nutrient-dense foods to the American diet through education, research, and activism. The foundation operates on a system of local chapters totaling 368 in the US and 50 internationally. The primary responsibility of each chapter leader is to locate sources of real food for both WAPF members and non-members who ask. Visit the site to find a chapter near you. Check out their annual Shopping Guide released every December with a comprehensive listing of sources for 30 food categories and other nutritious foods (free to members, or \$3 for non-members). The guide ranks the healthiest foods consumers can buy in health food stores, supermarkets, and farms, including foods that can be ordered online or by phone. The site really is a nutrition & health powerhouse with tons of information, recipes, events, articles, and videos on a variety of related topics. Explore the site!

LocalHarvest.org/organic-farms/

"There are almost two million farms in the USA. About 80% of those are small farms, and a large percentage are family owned. More and more of these farmers are now selling their products directly to the public. They do this via CSA programs, Farmers' Markets, Food Co-ops, u-picks, farm stands, and other direct marketing channels. **Use our map to find your farmer!** Large scale chemical agriculture is poisoning our soil, and our water, and weakening our communities. By buying direct from a family farm you can help put a stop to this unfortunate trend. By buying organic produce from your local farmer, you are working to maintain a healthy environment, a vibrant community, and a strong and sustainable local economy for you and your kids to thrive in."

EatWild.com/products/

"Eatwild's Directory of Farms lists more than 1,400 pasture-based farms, with more farms being added each week. It is the most comprehensive list in the United States and Canada for grass-fed or pastured meat and dairy products, including: Beef, Pork, Lamb,

“Cornucopia uncovers the truth behind organic food and advocates for an organic label you can trust. We are building a world where agriculture heals people and the planet. TCI continues to be a watchdog within the organic industry, working to protect the character of organic standards while auditing the integrity of products bearing the organic seal.” Here’s how it’s useful to you: tap ‘Scorecards’ at the top. You’ll be taken to a page where you can select their scorecard for specific products: eggs, dairy, beef, poultry, yogurt, plant-based beverages, snack bars, cottage cheese, cereal, soy food. When you tap on a scorecard you’ll be taken to a page where you can tap a link to each company they surveyed with clickable hyperlinks to that company’s website. It tells you within the scorecard grid: which products the company offers, if they sell online, where they are located, and their organic score. For example, on the beef scorecard there are 47 companies that scored 4 steaks (stars) out of 5 and above. Scroll down to ‘Independent Organic Brand List’ for a list of organic brands not owned by Big Food so you can show them your support with your dollars. Their Organic Dairy Scorecard at cornucopia.org/scorecard/dairy is mobile-friendly, allowing users to check brand ratings in real-time while shopping, allowing you to vote in front of the dairy case and support authentic organic farmers.

Please read this article on the benefits of raw milk, which are lost during processing: beefnews.org/raw-farm-op-ed-they-may-have-the-guns-and-the-money-but-we-have-the-truth-and-the-moms/. “Big Dairy pushes profits over people, but pioneers like Mark McAfee of Raw Farm are fighting back with the truth. Water

“For too many Americans, turning on their faucets for a glass of water is like pouring a cocktail of chemicals.” EWG’s latest analysis identified 324 contaminants in almost every community water system tested. Type your zipcode in at ewg.org/tapwater or search by state to discover if you need a good filter for your tap water. Page contains an article describing the health risks hidden behind legal contaminant limits, and also contains a guide to find the right filter for your water and your budget. Consider the filtration systems below.

“The gold standard in clean water.” Black Berkey Elements filters dramatically reduce trihalomethanes, inorganic materials, heavy metals, pharmaceuticals, pesticides, VOCs, petroleum products, perfluorinated chemicals, rust, silt, sediment, radiological material, and more than 200 typical contaminants in drinking water sources. Berkey Fluoride and Arsenic Removal Water Filters are designed for use with the Black Berkey Filters to absorb fluoride, arsenic, and other residual heavy metal ions. Berkey is currently tied up in court over labeling due to there being antimicrobial silver in the filter, which the EPA claimed was a pesticidal device. If you read through the court documents, it is plain to see that the EPA personnel are re-interpreting EPA regulations in order to influence the outcome of a private lawsuit rather than to follow EPA guidelines, in an act of blatant persecution. The EPA clearly does not want the public to have the ability to purify and drink clean water. The EPA has issued the company a stop work order, and it is currently in appeals court. Here is a European Berkey website that is tracking the lawsuit and posting updates, which includes the case number if you want to look it up: berkeywaterfilterseurope.com/blog/berkey-water-filters-sues-the-epa. Protocols

[MATH+ Protocol for Covid 19](#) (relevant to *any* viral outbreak)

Covid-19, flu, RSV treatment protocols. When the coronavirus outbreak hit the world, the experts declared that no anti-coronaviral therapy existed. Based on this assumption nearly all national and international health care societies recommended “supportive care only” which resulted in inexplicably high mortality rates with frequent prolonged

durations of mechanical ventilation. This led a group of medical experts to form the Front-Line COVID 19 Critical Care Alliance, which today is called the Independent Medical Alliance. Based on working with their patients, the alliance developed a treatment protocol of methylprednisone, ascorbic acid, thiamine, heparin and non-antiviral co-interventions (MATH+). Read the scientific studies supporting their use in treatment at [pmc.ncbi.nlm.nih.gov/articles/PMC8912998/](https://pubmed.ncbi.nlm.nih.gov/articles/PMC8912998/). If you or someone you love is hospitalized with Covid you can request the MATH+ protocol to save their life.

Download it at imahealth.org/protocol/math-covid-hospital-treatment/. You can also use this treatment protocol as a reference to obtain medicines to treat any viral outbreak, and the page says that it is still being updated to reflect the current treatment and to check back. You can download and bring with you treatment protocols for flu and RSV found here: imahealth.org/treatment-protocols/. The treatment protocol handouts won't be accepted by the hospital for any other named virus. I hope if and when more viral or biological outbreaks happen (Bird Flu? Measles?) imahealth.org will be updated to reflect new treatment protocols for our reference. The website is still posting new articles as of July 2025. You can also use a secure private browser to look into the names of the doctors who published this medical study and see if they've posted protocols anywhere: Pierre Kory, Ginfranco Umberto Meduri, Jose Iglesias, Joseph Varon, Flavio Adsuara Cadegiani, and Paul E Marik.

*In case you needed another kick in the bum, here ya go: **get your body in shape**. Exercise, eat right, and get enough sleep. Lift weights and avoid processed foods. Imagine having to run from the enemy, or roving gangs, when you’re out of shape, or navigating a world with no hospitals or medical care when you’re chronically ill, etc.

*Try to **find herbal alternatives to your prescriptions**, learn how to grow them from seedlings, and how to harvest and re-plant those seeds. Remember that many prescriptions are simply the patentable, synthetic form of natural substances. Anything which occurs in nature cannot be patented, or therefore exclusively sold.

The good news is that we have a powerful weapon in the war – our purchasing power. “The ability to shape corporate behavior and culture through our consumer choices can have a profound impact and we need to start using it more. We can no longer support brands that promote worldviews that are diametrically opposed to Truth. We need to continue making examples of brands who do bad things by refusing to purchase their products and services.”

“It’s like an online farmer’s market. Which means more money in your wallet.” (Wait, which farmer’s market are *they* going to?!) Due to health conditions in my family, I try

to minimize our exposure to endocrine disruptors, and I've been using Truly Free Home cleaning products since 2021. Just a few months ago they partnered up with several other natural product brands to create an online marketplace. Featured brands are: Truly Free Home, Primal Life Organics, Public Goods, Lifeboost Coffee, Cleanomic, and Nature's Craft. Some are made in the USA and some are not. At least one company, Public Goods, makes some products in the US and some internationally. Lots to choose from in every category. Home Goods: cleaning supplies, linens & bedding, home décor, bathroom, laundry, kitchen; Personal Care: cosmetics, skin care, oral care, hair care; Health: vitamins & supplements, fitness, pet health, baby & kid; Grocery: food, beverages, kitchen, coffee & tea; Clothing & Accessories. Free to shop, but there's an optional membership that saves you money and earns you cash-back. You can refer 5 friends and earn 5% cash back on everything they spend for their first 6 months of membership, plus members get a 1% share of all of Truly Free's earnings for life. At a lifetime membership of \$39, it pays for itself.

Some of these entries are Private Membership Associations. PMAs, or members-only retailers, are technically a "group of men and women who have chosen to associate in support of a particular activity or interest." PMAs are a way to become exempt from regulation by the government, via protection of the 1st and 14th amendments, as long as it doesn't present a clear and present danger to the public. They are only allowed by law to offer products at the discounted prices they do, or sell otherwise illegal products such as raw milk, because it is a PMA. Costco and organic grocery store co-ops are great examples. I was turned off by membership fees until I learned about this, so I thought it was important to add. Maybe you can also add the PMA idea to your sovereign toolbox. See 'Further Study' page for info on how to do a PMA the right way and not get in trouble. For more info and stats on PMAs visit pmapower.org/pma-private-membership-association/.

GiveSendGo.com

GiveSendGo is a Christian crowdfunding website founded in response to GoFundMe removing campaigns that they did not ideologically agree with.

A growing number of people are turning to credit unions and community banks in response to politically motivated debanking (thefga.org/blog/debanking-treats-law-abiding-citizens-like-criminals-but-states-can-set-them-free/), and the Select Subcommittee on the Weaponization of the Federal Government led by Rep. Jim Jordan caught several large banks colluding with the FBI to label you as a domestic terrorist (mailchi.mp/3f777022347b/supersecretglobalistgroup-15693387). Additionally, the US DOJ weaponized banks in an initiative called Operation Choke Point, where gun stores, CBD sellers, crypto traders, and anyone else the government doesn't like were debanked without a trial or appeal. Added small bank bonus: lower fees and better interest rates! Find a local bank in your area (home.solari.com/how-to-find-a-local-bank/) or check out the one below.

OldGloryBank.com

The US Constitution is Old Glory Bank's mission statement, which I think is pretty neat. **New August 2025:** easily link your crypto, stablecoins, and self-custodian wallet into a single dashboard, combined with your OGB accounts. They publish things you won’t find on censored American news.

Substacks & E-newsletters

Mercola.com

"#1 natural health website." One of the most useful things about this website is typing a medical concern into the search bar and reading all the articles that come up. The information that Mercola puts out is based in research (referenced within the articles) and most definitely upsets the unnatural order of the Rockefeller Medical Industry (meridianhealthclinic.com/how-rockefeller-created-the-business-of-western-medicine/). No wonder this very knowledgeable doctor has been banned! I most recently learned from his newsletter about DMSO and recommended it to someone close to me who cannot tolerate NSAIDs or Tylenol:

media.mercola.com/imageServer/Public/2025/January/PDF/dmsso-chronic-pain-pdf.pdf. (I was in awe to learn that DMSO helps your DNA proteins to fold correctly!) Sign up for the free newsletter to start taking charge of your health.

The Focal Points (Courageous Discourse) @TheFocalPoints.com

Previously titled *Courageous Discourse with Dr. McCullough and John Leake*, this Substack focuses on the advancement of clinical science, protection of personal autonomy, liberty, and Constitutional rights. Dr. McCullough is an internist, cardiologist, epidemiologist, and holds a Master of Public Health degree. He is known as one of the top five most-published medical researchers in the US and is the editor of two medical journals. He is also the Chief Scientific Officer at The Wellness Company (see 'Medicine' page). Another contributing author is Nicolas Hulscher, MPH, epidemiologist and administrator at The McCollough Foundation. When you hit the 'Subscribe' button there is a free option. I personally follow this Substack to get medical-related updates in politics and culture such as developments on Bird Flu, before that measles, and before that Covid. Dr. McCollough also posts his recommendations in this Substack such as what to take to detox from spike protein, how to measure your spike protein antibodies, and more.

Sports

Big 3 @Big3.com

BIG3 is a 3-on-3 basketball league founded by Ice Cube and entertainment exec Jeff Kwatinetz. The league is made up of 12 teams of former NBA players and international players. In July of 2023, Big 3 founder Ice Cube did an interview with Tucker Carlson, where they talked about Cube's skepticism about politics, called out the hypocrisy of the BLM leaders, and discussed why Cube turned down a \$9 million dollar movie role so he didn't have to take *The (not safety tested) Job*. Since its debut in 2017, Big 3 has built an entire league to rival the NBA. (China has a large ownership stake in the NBA which is why you see a lot of anti-American activism in the league.) Site offers game schedule, ticket sales, stats, merch shop. Every game is live and available on broadcast & streaming platforms CBS, VICE, Fubo, DirecTV Stream, Paramount+. On YouTube [@BIG3Basketball](#).

NBA's Jonathan Isaac of the Orlando Magic

Jonathan Isaac was the only player on the team not to kneel for BLM, because it "didn't feel right" to him. He has since started his own anti-woke apparel line Unitus, which focuses on Christian-based values and bringing people together under the tenets of God and country [@WeAreUnitus.com](#). Currently offers several different types & colors of sneakers, activewear, sweatshirts, sweatpants, and hats available for adults and youth. Buy his book *Why I Stand*, where Isaac shares how his Christian faith shaped his life and helped him overcome various struggles. Snag yourself an Orlando Magic jersey #1.

NBA's Enes Kanter Freedom formerly of the Boston Celtics

Enes is a vocal human rights activist who calls out the human rights abuses in China, and their puppet LeBron. A newly American citizen and Turkish immigrant, he got put on Turkey's 'Most Wanted' list for calling President Erdogan a dictator. I mean, way to prove him right! Pro-medical-freedom and anti-gun-control. In 2024, Enes announced his plan to run for Congress in 2028. Fly that Celtics jersey #13! Those jerseys appear to be hard to come by but you can always hit up a custom jersey shop.

MLB's Texas Rangers

The only MLB team to resist hosting a pride night despite national pressure. 2023 World Series Championship winners.

Riley Gaines @RileyGaines.com

"Athlete, Advocate, Woman" 12x NCAA All-American, 5x SEC Champion. Riley is a leader defending women's single-sex spaces, advocating for equality and fairness, and standing up for women's safety, privacy, and equal opportunities. She became one of the most powerful voices to speak out against discrimination by the NCAA, USA

NFL's Harrison Butker of the Kansas City Chiefs

One of the most accurate kickers in NFL history and won 3 super bowls with the Chiefs. As a guest on a podcast in March of 2022, Butker famously stated that he would rather retire than compromise his morals by taking the Covid 19 vaccine. As expected, this sent the Kommunist Kult into hysteria, with many calling for his resignation. At a May 2024 commencement address at Benedictine College, Butker criticized legislation that makes it illegal to state the fact that Jewish people were responsible for the murder of Jesus Christ: "We fear speaking truth, because now, unfortunately, truth is in the minority. Congress just passed a bill where stating something as basic as the biblical teaching of who killed Jesus could land you in jail." Read the bill (HR 6090 2023-2024) here: govinfo.gov/content/pkg/BILLS-118hr6090eh/pdf/BILLS-118hr6090eh.pdf.

Congress.gov shows the bill passed the house but never made it through the Senate chamber of Congress. It seems our house lawmakers have confounded saying that Jews killed Jesus with blaming Jews collectively for it – which is not the same thing. But, as with so many ideas the devil perverts, it sounds reasonable to the unsuspecting. To me, this bill sounds like a slippery slope to the death of freedom of speech like what's happening in the UK (for example, see The Rape of Britain on the 'Documentaries' page). To show your support for Harrison, fly his Chiefs Jersey #7, or shop his couture menswear at Shepherds.com.

*NFL's Nick Bosa of the San Francisco 49ers

Spotted wearing a MAGA hat during a postgame interview and got fined several thousand dollars for it, also previously faced criticism for his political beliefs. Selected 2nd overall by the 49ers in the 2019 draft, and named defensive rookie of the year. 2022 defensive player of the year award winner. Highest-paid defensive player in NFL history. 49ers jersey #97.

Gab.com banned from app stores

“Where free speech reigns.” Founder Andrew Torba. 100% user funded. They remove bots, so you get real human interaction on the platform. On X, the creator said that the social media site is structured less around individual people and more around following interest groups, so join groups and interact there to get the most out of the platform. You will also see Gab peppered throughout this document – they have a Public Square-like marketplace where you can shop and post your business, there’s a payment processor gabpay.info, it even has it’s own AI Gab.ai. Check out the image generator at Gab.ai/start/gabby which made the cover of this book for me. Awesome job, Gabby, thank you!

Pilled.Net

“An open social network for Free Speech and Expression. Pilled is a new and growing social media network focused on giving the freedom of choice, speech, and expression – regardless of political views. Live-stream, post articles, content, videos, pictures, create public and private groups, send direct messages, and support your favorite content creators – without worrying about you or them being censored, punished, banned, booted, or deplatformed for differing political viewpoints.” Most will say this is a right-wing hangout. Also has merch shop, news feed, and more.

*Minds.com

An open-source, privacy-focused, end-to-end encrypted, and distributed social network where users can earn Ethereum cryptocurrency tokens for using it. Co-founded in 2011 by Bill & John Ottman as an alternative to Facebook, and denounced by mainstream media as “far-right”. From the homepage, for businesses: “Launch your own social media app in minutes for your brand on your website. Build custom integrations. Interoperable with web2 and web3 protocols.” It had 2.5 million registered users back in 2020 (updated info unavailable). Minds is available on desktop or iOS & Android.

Before downloading an app, actually read the fine print before you hit “I Agree” and you’d be surprised by what you find. They’ll often bog it down in jargon so try looking some of those terms up to see what they actually mean. On social media and other Big Tech apps one permission (of many) you need to agree to is for “Active Listening” which means that your phone can listen to you - and it does so even when you are logged out of the app. (insiderpaper.com/our-phones-are-really-listening-to-our-conversations-marketing-firm-reveals/) Avoid this and other malicious permissions (nordvpn.com/blog/app-permissions/) by simply visiting or logging on through the web address, and using a VPN.

THE total replacement for YouTube (unless you want to watch something benign like a how-to video then you might be stuck with YouTube). On Rumble you can “host, distribute, and monetize all your professional, social, and viral video. Rumble values freedom, creativity, and control over one’s own creations, and aims to protect a free and open internet.” Rumble describes itself as a “high-growth neutral video platform that is creating the rails and independent infrastructure designed to be immune to cancel culture.” The accounts that I followed who got kicked off YouTube in 2020 & ‘21 for speech The Ministry of Truth didn’t like, all moved over to Rumble. Tabs are: editor picks, trending, gaming, crypto, live, sports, viral, podcasts, UFC, news, music, and more. The White House channel can be found at [Rumble.com/WhiteHouse](#).

[Odysee.com](#)

“Odysee aims to build a more freewheeling, independent video platform. Site created using LBRY blockchain, so creators have more direct control of their content and their audience.” Here’s a flex from Wiki: “The platform’s approach to content moderation, which is significantly less restrictive compared to 1984-esque platforms like CommieTube, otherwise known as YouTube, has attracted a range of users, including

far-right groups, conspiracy theorists, and individuals from banned platforms. Oh my! In addition to allegations of facilitating speech that we hate, Odysee has also been criticized by globalist & Pharma-funded operations for hosting disinformation, particularly around topics such as Covid-19, vaccines, and political issues.” Ok, so the stuff in quotes isn’t *verbatim* what Wiki said, but it’s what they actually meant. (When I read stuff this is the way my brain talks to me and there’s always a lot of eye rolling and scoffing.) Odysee hosts all kinds of media such as images, articles, PDFs, audio files, etc, but they are best known for hosting videos. A successor to YouTube, recapturing the spirit of 2000s internet freedom. Privacy Tech & FOSS

(Free & Open Source Software)

Secure Web Browsers

Have you heard the phrase “do your own research”? Well, when you’re looking for the truth but all you have at your disposal is Google... what do you do?! You stop using Google, and you download other browsers. It doesn’t matter which secure browser you use to do your browsing, as much as it matters NOT to use the ultra-censored, big tech search engines. (Such as Google, Microsoft Edge, & Safari.) Just Google “secure browsers” and find one that you like. Duck Duck Go censors searches (knowyourmobile.com/data-privacy/the-duckduckgo-controversy/), and everyone agrees that Brave has a “left leaning problem”.

Tor

“Protect yourself against tracking, surveillance, and censorship.” Tor is free and open source software enabling anonymous communication, run by volunteer-operated relays. Available in 36 languages. Download for windows, macOS, Linux, or Android at torproject.org/download/.

SearXNG @SearX.bndkt.io

Free and open-source, privacy-respecting, hackable metasearch engine that blocks tracking cookies and IP address sharing. Pulls searches from 82 different engines including Tor hidden services.

Ecosia.org/browser

Plants trees every time you search. Uses its own algorithm to facelift Bing search results. Does not build a personal profile on you, does not sell your data to third parties. Search queries and IP address collected but then anonymized within a week. However it does assign you a Bing Client ID, so this is not completely private, but I do somehow get good search results when using, so you may still want to add this to your tool box.

Operating Systems, Cloud Storage, VPNs, & AI

The simplest way to protect your identity and privacy online is to use a secure browser, and a VPN. A VPN hides your computer address so that nothing you do on the internet can be traced back to you, and your data can't be tracked and sold. As an added bonus, having a VPN also protects you against hackers. There are many good, secure VPN services listed in this article reclaimthenet.org/recommended-vpns, or try the one below.

Proton VPN & Proton Drive @ Mail.Proton.Me & Proton.Me/drive

I use proton's email service (instead of my gmail, for all my government-unapproved topics) and also their VPN. I ultimately chose Proton because they're based in Switzerland and the Swiss do not comply with international requests for data. End to end encrypted. **Get a VPN on one device for free.** Proton also offers end-to-end encrypted cloud storage. No one but you and the people you choose can access your files – not even Proton. **5 GB of free cloud storage**, or additional storage plus more features for a low cost. Also within Drive you can create and connect with collaborative document editing and secure sharing features. Proton Stealth VPN is almost completely undetectable, bypassing VPN blockers and networking restrictions. All Proton services are open source. **NEW** from Proton July 2025: Lumo, the zero-access encrypted AI assistant that does not track or record your conversations.

Rumble.cloud also does **cloud storage**, see 'Services for Businesses & Nonprofits' page.

Free & Open Source Software (FOSS)

LibreOffice.org

A **free and open source Microsoft Office-like software** available for use by anyone and free of charge. Ideal for home users, students, and non-profits. Consists of programs for word processing; creating and editing spreadsheets, slideshows, diagrams, and drawings; working with databases; and composing mathematical formulae. Available in 120 languages. Compatible with Microsoft Windows, macOS, and Linux operating systems. Provides apps for Android, iOS, iPadOS, and ChromeOS. LibreOffice is the default office suite of the most popular Linux distributions. The other day when my Word program got glitchy on me, I switched Exit the Matrix over to Libre and I am so glad I did! It is almost identical with a few differences that are simple to navigate. If you have a question you just use the links under the ‘Get Help’ tab to find your answer, or ask the community and someone helps you right away. Saves to files exactly like Word, and there are even additional features which I appreciate. Do not be afraid to try this. If I can figure it out with my basic tech “skills”, then so can you! Download here: libreoffice.org/download/download-libreoffice/.

Anon Addy @addy.io

A **free and open source email forwarding service**. I recently discovered this out of necessity when an online service refused to let me register using my Proton email address. I am not a very tech-oriented person – I really just know the basics – and it was simple to figure out how to use. OpenWRT.org

The most popular free and open source wireless router project. “In 2004, when Linksys released the firmware code for the WRT54G router series, coders and tinkerers regained control over their own routers, and launched OpenWRT based on the sources liberated from GPL enforcement. Today, OpenWRT leverages software freedom protected by the GPL to share that freedom and control with everyone who uses wireless routers to connect to the internet. People install OpenWRT because they believe it works better than the stock firmware from their vendor. They find it is more stable, offers more features, is more secure and has better support.” November of 2024 OpenWrt One released their first (unbrickable and FCC-complaint) router built with your right to repair and software freedom in mind: dual-band WiFi, PoE, dual Ethernet ports, mikroBUS expansion header. Politics

It is imperative for all of us to understand that when we work together, we can accomplish great things in the legislative process. This brings up a story about how homeschooling freedom was changed for the better. This example was merely the pinnacle of a decade-long, statewide struggle with the state of Nevada for homeschooling rights. In 1994, HR6 was introduced in the US Congress, and would have essentially eliminated a parent's right to educate their own child. But Nevada homeschool parents, along with Nevada Homeschool Network, and 20 thousand more homeschool parents across the nation worked together in nearly shutting down the Capitol Switchboard in Washington, D.C., over multiple days, with telephone calls opposing HR6. Capitol insiders speculate that there have never been so many responses recorded on one bill in the history of the U.S. Congress! Ultimately the bill was amended to protect the right of parents to educate their own child.

This story is living proof that your testimony, input, calls, and emails make an impact when we all do it together! Getting actively involved in local politics by running for office or volunteering with your local political organizations is also highly encouraged!

Private property is a topic I am very passionate about, and you should be, too. The Declaration of Independence originally stated that people have Unalienable Rights Endowed by their Creator such as "Life, Liberty, and Property." However, a fierce debate ensued, and "Property" was replaced by "The Pursuit of Happiness". You won't read this anywhere in the history books, but it is obvious to me that those who debated the Property endowment were the elite or their infiltrators who knew that allowing private property to remain an Unalienable Right would be a crushing blow to their prosperity as rulers of this world. Founder John Locke, who

September 2025 Ed.

introduced Property as an Unalienable Right, knew that private property ownership is the key to generational wealth. If you cannot own property, you will be nothing but a renter, subject to fiefdom for life. "The environmental movement is actively working to turn half our nation into a nature preserve, off-limits to everyone from backpackers to farmers. We push back on their agenda every single day. If we lose our right to own property, we will lose more than just our land. Unless we stop this agenda, we will cease to be the land of the free." The dream of net-zero carbon emissions and its dream of blanketing hundreds of millions of acres of American land with wind turbines and solar panels is running up against the reality that most of the land in America is still privately owned. Government subsidies for private contractors means there is a ton of money to be made off wielding eminent domain. (theepochtimes.com/article/seizing-private-land-is-next-step-in-fight-against-climate-change-5544056/) Our government is trying to reach a nationwide net-zero by 2050 (Biden's Executive Order 14008, bypassing a vote by the people or even by Congress, was rescinded by President Trump on day 1 in office, but we are still in jeopardy until codified into law). In 2019 70% of land was privately owned, today that number is down to 60%, and the federal government wants to own and restrict access to 50% of American land by the year 2050. **Tap 'Join the Fight' at the top of the home page to see ways you can help, then scroll to the bottom of that page and tap 'Subscribe' to receive their bi-weekly Liberty Matters e-newsletter, which contains calls to action.**

Further Study, Politics

What is a special interest group?

What is an NGO (non-governmental organization)? The basic idea here is that people (like Bill Gates or George/Alex Soros) and the government will use non-governmental organizations to do things which would be otherwise illegal for them to do themselves. NGOs purport to be on an altruistic mission, but it's really just a pipeline for out-of-

work democrats, with 90% of them being run by left-wing activists and individuals from prior democrat administrations. They accept federal grants (your taxpayer dollars) and hand them over to their ideological allies to engage in state-funded activism, with little to no oversight or accountability. These NGOs function as monetary intermediaries, passing funding down the pipeline rather than offering a direct service, which further masks transparency and becomes ripe for fraud and abuse. For example, money allocated to fight climate change ends up in the hands of pro-Palestine and anti-Israel propaganda campaigns (open.substack.com/pub/amuseonx/p/subsidizing-the-left-how-ngos-became). Or when USAID grants money to World Vision who then sub-awards an Islamic terrorist group. Or when NGOs funnel foreign money into our elections. Or when NGOs fund an invasion (gooden.house.gov/2022/2/gooden-introduces-bill-to-defund-non-profits-facilitating-border-crisis). These examples and countless more could be their own separate book. You get the picture. This is how NGOs become policy-makers without the accountability demanded of our government. If you're interested to learn more about how this works and calls to action, see here: coreysdigs.com/wp-content/uploads/2018/07/History-of-NGOs.pdf, and here: web.archive.org/web/20250215151547/https://stopfundingleftistngos.com/, and here: open.substack.com/pub/omega4america/p/voter-integrity-fizzles-into-death.

They know that people are catching on and paying attention to ESG so instead of knocking it off, they're re-branding it hoping it gets lost in the muddle (the devil and communists are constantly using this tactic). **Other names for ESG include "DEI" (diversity, equity, and inclusion); "CSR" (corporate social responsibility), "sustainability", "green economy", "energy transition", "sustainable investing", "responsible business", or "transition investing"**. The basic idea here is that businesses are strong-armed into prioritizing a political agenda over maximizing returns for investors. The political agenda requires more and more funding and more and more compliance yet somehow never gets achieved, while simultaneously centralizing power further into the hands of a few, and taking power and control away from **you**. The East Albuquerque location defied lockdown orders and held a massive Christmas Eve service back in 2020. The West Albuquerque location held a massive Charlie Kirk gathering August 2025. Legacy Church’s website says it’s non-denominational but at some point in its past identified as Full Gospel, and to me their ‘Beliefs’ page seems to fit that bill. In response to the lockdown defiance fines imposed by the state of New Mexico, a spokesperson for the church said, “When governments exceed their Constitutional authority and contradict what we are called by God to do, we answer first to His authority. We must continue to do what we are called to.” Tap ‘Watch’ for the livestream Sundays @9 am, 10:45 am, and 12:30 pm, access the YouTube channel, and view past sermons. While I visited the YouTube channel @LegacyChurchNM, a sermon preview happened to be playing and the pastor was talking about climate change & population control. Definitely our kind of sermon.

Christian Colleges

You can learn a lot about what the climate is like in these colleges by typing it into your private search engine and reading comments in forums: how the theology leans, and what types of jobs you're going to be able to get once you graduate. Another great resource I came across is this webpage from DefendingEd.org with links and suggestions for vetting colleges such as ways you can investigate their free speech policy, and how to find their DEI policy and political leanings: defendinged.org/resources/how-to-research-a-colleges-real-culture/.

Calls to Action, and To-Do Ideas

Stop patronizing any businesses which do not accept cash, such as Dunkin Donuts, and Tropical Smoothie Café. Stop patronizing businesses which employ palm scanners for payment such as Whole Foods and Panera Bread. These businesses have been captured by globalist CBDC pushers, and will be the first to demand payment via the Mark of the Beast, whenever that gets here. For additional information on the risks of CBDCs visit cato.org/visual-feature/risks-of-cbdcs, or view their *Assessing the Risks and Dispelling the Myths of CBDCs* pdf at cato.org/sites/cato.org/files/2023-01/briefing-paper-145.pdf.

Start growing your own food if you haven't already. A good way to start getting familiar is by keeping some fresh herbs right in your kitchen, which can even be kept on a windowsill in a small apartment. You can also start with food that keeps for a few weeks, like potatoes, garlic, and citrus trees (can be grown in pots). Look into vertical gardening (try TowerGarden.com). Learn canning to preserve what you can't eat right away.

Bring back the victory garden movement!

During WWII the government rationed foods, so citizens were encouraged to plant “Victory Gardens” in order to become self-sufficient. It called on Americans to grow their own fruits and vegetables in whatever spaces they could, such as rooftops, fire escapes, empty lots or backyards. Help spread the word by using hashtag #victorygardenmovement on social media or with your Temporary Bumper Sticker™ (using washable marker paint on your rear car window) and share with your friends!

A pdf created by me for you to print & share. If someone reads it and they don't change their mind about Disney, then they never will. One thing I do with these is leave them on cars with Disney stickers (*especially* ones with the spiral ear logo!) Share with anyone who worships Disney, but try to be gentle because some can find it shocking and offensive (and that's ok!) Copy and paste to email or post online; print it and hand it out at events; get creative. If I were a decent person who worshipped Disney, I would want to know about this stuff. If they don't know, they won't stop supporting it, so shine that light into the darkness!

[Smatter the town with White Rose stickers](#). The White Rose was a non-violent, intellectual resistance group in Nazi Germany which was led by five students and one professor at the University of Munich. The group conducted an anonymous leaflet and graffiti campaign that called for active opposition to the Nazi regime. Unfortunately these calls to action were unheeded as were the warnings of Bonhoeffer, and the Nazi regime was able to carry out their genocide. The activists of the White Rose were imprisoned and executed by guillotine, but their spirit lives on today. Other Parallel Economy Resources

These are the gems with whom I share a vision; these are someone else's version of this same list. Please check them out for even more resources!

CoreysDigs.com

Click on 'Subscribe to Digs' to receive emails with info on new parallel economy options and updates. Click on tab "For Diggers" for expert resources on how to find and verify hidden information, with articles such as "Hunting The Hunters: Digging Into Foundations" and "Must-Have Tools for Digging, Videos, Websites & Podcasts". Also offers The Solution Series: a free, 24 episode series focused on food resources, how-tos, local community building, survival & preparedness, alternative resources, wellness & healthcare, and more solutions to help you exit the matrix (see entry below). **Visit this page for Corey's version of this book: coreysdigs.com/global/fearless and find links to regenerative farms, how to build a homestead, heirloom seeds, health sharing ministries, how to find a local bank, and a "knowledge pantry" which is Corey's version of a "further study" resource.** Tap 'Podcast' tab for "Dig It!" podcast with Corey Lynn every Friday morning on Rumble, Bitchute, SoundCloud, Spotify, Odysee, Pilled, iHeart Radio, Stitcher, TuneIn, and banned by YouTube. Site also offers a bookshop and swag. There are a lot more features of the site, and so many awesome links and articles to explore. Take a peek!

CoreysDigs.com/the-solution-series

"24 video episodes to bring you solutions, resources, and tools from brilliant individuals. We focused on areas such as food resources and how-to's, local community building, survival and preparedness, alternative resources, wellness and healthcare, financial tips, and so much more." Free. **This is a version of Exit the Matrix but in video form.** Scroll down to 'Resource Page' for their resources list that is basically a mini-Exit-the-Matrix, and complimentary to the Solution Series videos.

Previously titled: A Library for Redpilling by Corey Lynn

[@coreysdigs.com/downloads/coreys-digs-library-catalog-volume-13/](https://coreysdigs.com/downloads/coreys-digs-library-catalog-volume-13/)

This is another version of Exit the Matrix, but with far less detail. A pdf chock full of primer articles, deep investigative reports on agendas and corruption, videos, and educational & inspirational pieces for spotting and overcoming manipulation tactics. Also included are extensive resources and tools for researching and fact checking. Updated quarterly.

AmericaMission.com

You can find another resource list much like this one by visiting americamission.substack.com/p/resources or by tapping 'Resources' on the homepage

September 2025 Ed.

under 'Curating Tools & Resources'. Topics include: **more multi-subject resources**, private search engines, recommended books & videos, everything congress, education, 2020 election, J6, off grid, social media, and more. "Woman In A World Gone Mad: Exit the Matrix" book by yours truly can also be found there under 'Multi-Subject Resources' (thank you Kelly Jaye)! Every time I visit the site to check for updates, I end up grabbing something off of it to add to this resource. So many goodies, please give it a gander! In addition to parallel economy resources, America Mission has an excellent news-recap feature for busy people who don't want to miss anything: the *AM Grind Wrap-Up*.

*ParallelTimes.info

Scroll a tiny bit down to where it says "Get a free download of 'Checklist and Blueprint for Leaving the Matrix and Joining Parallel Society'" to have a free pdf emailed to you that, as of August 2025, is only 19 pages long. This is their version of this book. On page 2 there's a little grid where you can write down your accomplishments in the different categories so far, and your goals, such as Maximize Food Independence; Maximize Tech Privacy & Minimize Surveillance; Optimize Your Health & Establish Alternate Forms of Healthcare, Establish Alternate Comms, etc. Instead of a list of resources (although it does include a few), the pdf is more of a giant To-Do List. I believe it will make an excellent companion to this book and I encourage you to download it.

DoorToFreedom.org

"We exist to help people make sense of a rapidly changing world, to stop efforts by the WHO and UN to centralize control during emergencies, and to preserve traditional farming and the production of healthful foods." Solution focused. Live streams on how to fight back, treasure trove of excellent articles on these topics, and legislation watch. Scroll down the homepage to find documents for activists, three letter agency resources, handouts for printing, talking point pdfs, memes & posters. Keep scrolling down to section titled 'Actions Around the World' for links to all the actions, petitions, open letters, demonstrations, and organizations working to stop the global coup, with a link to email them if you have something to add. Woke Alerts @ConsumersResearch.org/wokealert

America's oldest consumer protection agency since 1929. Instead of a list of who to shop with, this is a list of who *not* to shop with, and just as importantly, *why*. Sign up on the site to receive 'woke alerts' sent to your email inbox about products and companies pushing a marxist & globalist agenda. "Many corporations are putting progressive activists and their dangerous agendas ahead of customers. They'll only succeed if we look the other way." Site has 'Report Woke' infraction button, so if you see something –

say something! In December 2024 Consumers' Research published a Woke Alert exposing Kia for pushing radical gender ideology on kids through their sponsorship of GLSEN, a nonprofit organization that promotes sexually explicit books and lesson plans and is active in 8,100 schools in 33 states nationwide. After this Woke Alert was issued it was picked up by *The Daily Caller* and went viral on social media. Within days Kia pulled their sponsorship, and the logo had been silently removed from GLSEN's sponsorship page. I highly recommend subscribing to their e-newsletter at ConsumersResearch.org.

AltMediaDirectory.com/categories

"Dive into a hub of alternative media, where 'outsider' perspectives thrive beyond the echo chambers." Saw they were selling tshirts of the Georgia Guidestones (explosion anniversary 7/6/22), and knew I was in the right place. 'Categories' page is an alternative tech directory of open source tools & software, VPNs, search engines, platforms, podcasts, music, news, archives, directories, documentaries, alt finance, more. 'File Cabinet' on categories page is their version of 'Important Documents': CIA Psychotronic Weapons, abstracts of Dr. Nikola Tesla's writings, HAARP, Antifa manual, Epstein files, George Floyd autopsy report, so much more. Site also offers info on how to launch your own podcast, build your own website, and a 'Fringe Library' where you can discover new books. There's a huge metaphysical component to the site that is giving me Gnostic vibes, but hey, let's gather on common ground.

O'Keefe reveals the shocking reality of the US border crises like never before: Mexican freight trains, cartel tunnels, and US-funded child-detention camps. "The Out of Shadows documentary lifts the mask on how the mainstream media & Hollywood manipulate & control the masses by spreading propaganda throughout their content." Free. OutOfShadows.org redirects to the sequel page [IntoTheLight.Movie](#).

The Shadow State original documentary by Epoch Times

"Explores how individual rights and freedoms have disappeared due to a system in place to control and monitor humanity, which ties in to one of the Bible's most fascinating prophecies." This documentary also explains how ESG investment funds are controlling corporate boards into "Equity and Diversity" policy decisions, for example, why Bud Light put Dylan Mulvaney on their cans and alienated their customer base.

CBDC: The End of Money

"This movie is an in depth inquiry into CBDCs, digital IDs, the origins of Bitcoin and the tokenization of all people, objects and assets worldwide. Central Bank Digital Currencies are being pushed worldwide by the Bank of International Settlements and governments. Are we witnessing the natural evolution of money into a fully digital form or a pervasive system of social control masquerading as money? CBDCs allow our money to be programmed, determining what we can and cannot buy, where we are allowed to buy, and to be shut off at the press of a button." Visit CBDCTheEndOfMoney.com, tap the link 'Watch the Movie', enter your email address, and a few seconds later **you will be sent a link to watch the 1 hour and 15 minute documentary for free.** The call to action is that when, not if, you are given the option to opt-in, **say no**, no matter what the consequences. *If enough of us opt-out, we can put a stop to it.* You should be networking with like-minded folks in preparation for this. If you know you'll have food & shelter in place outside of the control grid, you'll be able to stay strong against giving in.

Enemies Within: The Church @[EnemiesWithinTheChurch.com](https://enemieswithinthechurch.com), also a book

"A movie experience that provokes a passionate return to Orthodox Christian faithfulness across the western world. A clarion call for Christians to turn away from popular, yet errant beliefs held in contradiction to Holy Scriptures. It is also an invitation for believers of every denominational stripe to employ a proven biblical recipe capable of producing restored strength and blessing for all who answer. Specifically, the movie encourages the Church to cleanse itself from contamination imposed by cultural Marxism and a heretical teaching known as 'The Social Justice Gospel.' It answers the question: 'What happened to living, powerful, transformative, nation-shaking Christianity?' The documentary reminds its audience that during the twentieth century, the twin evils of communism and fascism were responsible for the slaughter of nearly 200 million people. Both forces attempted (and were often successful) to co-opt Christianity to serve their goals. The filmmakers show that the Marxists are still actively and successfully pursuing this goal in a church near you at this very moment. This documentary has informants from inside the organizations who have provided concrete proof of left-wing front groups providing money in exchange for the promotion of cultural Marxism, which deliberately lures evangelicals toward the acceptance of varying degrees of political and theological liberalism and its unavoidable consequences. These church infiltrators have already begun implementing one or more of the following Marxist programs: Social Justice, Critical Race Theory, and Same-Sex Attracted Christianity. Enemies Within the Church asks pertinent questions about history to learn how this happened and how we got here. In the end, the audience is

pointed toward a hope-filled and practical action plan that produces solutions found only in and through the royal Law of Christ.” \$12.95 on vimeo. It’s well worth it. Ask your church to hold a viewing.

The Rape of Britain by Tommy Robinson

Deep State/Elite/Control Grid

Breaking the News

by Alex Marlow, May 2021

“From the editor in chief of Breitbart News, a firsthand account of how the establishment media became weaponized against Donald Trump and his supporters on behalf of the political left. Deeply researched and eye-opening, Breaking the News rips back the curtain on the inner workings of how the establishment media weaponizes information to achieve their political and cultural ends.” The most informative section of the book, to me, was when he describes how Hannah-Nikole Jones admits to fabricating the *1619 Project* - which is being taught in history class across the nation - and how the media covers for it.

Woke, Inc.: Inside Corporate America’s Social Justice Scam

by Vivek Ramaswamy, August 2021

“A young entrepreneur makes the case that politics has no place in business and sets out a new vision for the future of American capitalism. ‘Stakeholder capitalism’ makes rosy promises of a better, more diverse, environmentally friendly world, but in reality, this ideology, championed by America’s business and political leaders, robs us of our money, our voice, and our identity. America’s elites may want to sort us into demographic boxes, but we don’t have to stay there. *Woke, Inc* begins as a critique of stakeholder capitalism and ends with an exploration of what it means to be an American in 2021 – a journey that begins with cynicism and ends with hope.”

Laundering with Immunity: The Control Framework

by Corey Lynn, September 2022

“This is the story that needs to be shared with the world and with every state legislator who should move immediately to create independence from the Federal Reserve system and Central Banks, and enforce our Constitution and financial management laws to protect sovereignty at the state and local level. This should include steps to recapture monies illegally stolen, to prevent current and future illegal expenditure of our tax monies and to end sovereign immunity privileges that have been used to engage in systematic criminal activities and racketeering.” E-book download available at coreysdigs.com/downloads/laundering-with-immunity-the-control-framework-part-1-bookshop/.

Banking and Currency and the Money Trust

by Charles Lindbergh Sr, January 1913

Lindbergh Sr's take on banking and the economy in America, just prior to the formation of the Federal Reserve System, the passage of which Congressman Lindbergh spoke boldly against, predicting the dire result of turning the nation's purse over to a private banking cabal. The book not only exposed the Federal Reserve but named names, so by 1917 it had been censored and the printing plates had been destroyed. **Read the book** and realize that the Federal Reserve Act of 1913 must be soundly repealed, **for free** at famguardian.org/Publications/BankingAndCurrencyAndTheMoneyTrust/Banking-and-Currency-and-the-Money-Trust-by-Minesota-Congressman-Charles-a-Lindbergh-Sr.pdf.

*The Creature from Jekyll Island: A Second Look at the Federal Reserve

by G.E. Griffin, 1994

"Where does money come from? Where does it go? Who makes it? The money magicians' secrets are unveiled. Here is a close look at their mirrors and smoke machines, the pulleys, cogs, and wheels that create the grand illusion called money. A boring subject? Just wait! You'll be hooked in 5 minutes. Reads like a detective story – which it really is. But it's all true. This book is about the most blatant scam of history. It's all here: the cause of wars, boom-bust cycles, inflation, depression, prosperity." The book fully explains how the Federal Reserve's fiat money is Monopoly money designed to steal wealth from the American public, and makes the case for abolishing the Fed with reasoning and evidence. **Find it free** at [dn790003.ca.archive.org/0/items/pdfy—Pori1NL6fKm2SnY/The%20Creature%20From%20Jekyll%20Island.pdf](http://dn790003.ca.archive.org/0/items/pdfy-Pori1NL6fKm2SnY/The%20Creature%20From%20Jekyll%20Island.pdf).

Indoctrination Education

Children of the Collective

by Connor Boyack (Tuttle Twins), December 2022

"Throughout history, totalitarians have recognized the importance of propagandizing the rising generation in order to maintain and increase the state's power. But as Children of the Collective explains, there is one institution uniquely positioned to keep the state's power at bay and protect our children..." "Embedded in the book's devastating and indisputable primary message are unexpectedly profound insights on teaching and reaching our children to keep them from becoming a part of the collective."

Indoctrinating Our Children to Death: Government Schools' War on Faith, Family, & Freedom – And How to Stop It

by Alex Newman, January 2024

Building on over a decade of research and investigative reporting into the indoctrination, sexualization and dumbing down of children, Alex Newman documents the untold history behind government education and its founders like nobody has ever done before. The book proves that the system is not "broken," but is working well when considering the goals of its architects. These goals included turning America away from God, fundamentally transforming the nation away from its Constitutional foundations, and more. Using primary-source documentation, interviews, and insights from leading experts, Newman not only diagnoses the problem but also offers true solutions that are long overdue. The book expands on Newman's 2022 film *The Homeschool Awakening*.

Patriotism & Fighting Back

The 1776 Report

by the President's Advisory 1776 Commission, July 2021

"The declared purpose of the President's Advisory 1776 Commission is to 'enable a rising generation to understand the history and principles of the founding of the United States in 1776 and to strive to form a more perfect Union.' This requires a restoration of American education, which can only be grounded on a history of those principles that are 'accurate, honest, unifying, inspiring, and ennobling.' And a rediscovery of our shared identity rooted in our founding principles is the path to a renewed American unity and a confident American future."

Rules for Retrogrades: Forty Tactics to Defeat the Radical Left

by Timothy J Gordon & David R Gordon, March 2020

"A retrograde calculates, night and day, how to return the world to: the Old Order of moral and sexual decency; classical masculinity; national sovereignty and national borders; faith and hope and charity; goodness and beauty and truth; Christian civic liberty; and most importantly, the social kingship of Christ. The retrograde has the unique capacity for understanding the stark chasm between the degenerate, socialist-infiltrated world of decay on one side and the well-meaning, good-hearted, but clueless Christian world on the other. Retrogrades... to the streets: our aim is to reverse the deliberate, deuced machinations of 'radicals' like Saul Alinsky who, by penning the rulebook of radicalism, threw down a challenge that has, until now, gone unanswered. Rules for Retrogrades is the handbook men of good will need to win the culture war!"

Christian Nationalism: A Biblical Guide for Taking Dominion and Discipling Nations

"We were commanded by Jesus Christ to make disciples of all nations and that's exactly what we are going to do. Christian Nationalism is not a movement of racial supremacy, nor is it a movement of national supremacy. It is the Revealed Truth of God's Word lived out in action through the discipling of the nations – all nations."

The Bible was not the King James Version.” The Pilgrims disapproved of KJV because it was translated from the Latin Vulgate and was considered a Catholic version. “When James I became king of England in 1603, there were two translations of the Bible in use; the Geneva Bible was the most popular, and the Bishops’ Bible was used for reading in churches. *Vaccines: Mythology, Ideology, and Reality

by John Leake and Peter A. McCollough MD MPH, July 2025

“Tells the story of vaccine technology and the celebrated men who developed it with some success, but also with failures that are never mentioned in the celebratory literature. Vaccine advocates often proclaim that they ‘follow the science,’ but most vaccine development has been a matter of guesses, gambles, and wild experimentation. Its key figures have been biased by religious faith, wishful thinking, ideology, and a desire for recognition and money.” The book also examines “the history and development of synthetic mRNA and its reckless and hasty misapplication to producing gene therapy shots to immunize against a respiratory viral infection.”

*Dissolving Illusions: Disease, Vaccines, and the Forgotten History

by Dr. Suzanne Humphries and Roman Bystryanyk, July 2013

“Dissolving Illusions details facts and figures from long-overlooked medical journals, books, newspapers, and other sources. Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline of mortality from infectious diseases. If the medical profession could systematically misinterpret and ignore key historical information, the question must be asked, ‘What else is ignored and misinterpreted today?’” You can **read the first 71 pages free** at DissolvingIllusions.com. Food & Food Preservation

Feeding You Lies

by Vani Hari, February 2019

The Food Babe blows the lid off the lies we’ve been fed about the food we eat – lies about its nutrient value, effects on our health, label information, and even the very science we base our food choices on. You’ll discover: how nutrition research is manipulated by food company funded “experts”; how to spot fake news generated by Big Food; the tricks food companies use to make their food addictive (Did you know that one of these “tricks” is using aborted fetal cells to trick your brain into thinking a food tastes good when it does not? If that’s not the devil then what is?!); why labels like “all natural” and “non-GMO” aren’t what they seem and how to identify the healthiest food; food marketing hoaxes that persuade us into buying junk food disguised as health food. She also offers a blueprint for living your life without preservatives, artificial sweeteners, additives, food dyes, or fillers, eating foods that truly nourish you and support your health. The enemies' playbook says that if there is to be a rebellion, then they will lead it. Why is our scholarly attention always turned to *The Federalist Papers* – what about the *Anti-Federalist Papers*? *The Anti-Federalist Papers*, a collection of 16 essays written in 1787 by Robert Yates under the pseudonym "Brutus", were a rebuttal to the new proposed Constitution, which Yates believed provided too much central power. Maybe he was onto something there. "Brutus" championed the Articles of Confederation, which provide more power to the states, and therefore, to the people. Federal Quarantine, Inspection, and Testing Laws

42 USC 264 through 272 – Quarantine and inspection, regulations to control communicable diseases (foreign, domestic inspection and quarantine provisions, etc.). Enacted by Congress in 1944. These sections in the US Code state that some unelected health official can decide to detain and test you for an unspecified amount of time, if they suspect you might be infectious, during a time of war, among other things that should be illegal and are most definitely anti-liberty. It has been suggested by many in the medical freedom & truther community that fights around the WHO pandemic treaty are just a distraction to occupy the time and energy of people who might otherwise work on repealing federal and state public health emergency and communicable disease control law. It has also been said that every state has them, though I have so far only taken the time to verify their existence in Nevada and Louisiana state law. See the 'Nevada' and 'Louisiana State Specific' pages at the back of this book for those states' forced quarantine laws. I was alerted to this by [@bailiwicknews](#) on Substack if you want to give her a follow.

*Model State Emergency Health Powers Act

The MSEHPA was passed by many states in 2002 and includes provisions that would allow state health officials to: force medical examination, vaccination, and medication and not be held liable if these actions result in injury or death; seize property without compensation, including firearms; control all communications; ration food, fuel, and medicine; quarantine people indefinitely without appeal; take control of all roads leading into and out of cities and states. As of August 1, 2011, forty states have passed various forms of MSEHPA legislation. Full text available here: aapsonline.org/legis/msehpa.pdf. Complete Internal Facebook Onboarding Documents Used to Train CDC Employees on How to Censor the American Public

[@aflegal.org/explosive-censorship-documents-america-first-legal-releases-complete-internal-facebook-onboarding-documents-used-to-train-cdc-employees-on-how-to-censor-the-american-public/](https://aflegal.org/explosive-censorship-documents-america-first-legal-releases-complete-internal-facebook-onboarding-documents-used-to-train-cdc-employees-on-how-to-censor-the-american-public/)

Released September 2024. "America First Legal released additional documents from its litigation against the CDC, exposing the complete onboarding documents Facebook used to train CDC employees on their government censorship portal to block free speech on 'Covid & Vaccine Misinformation.' Americans remember the unprecedented level of censorship by the Biden-Harris Administration in 2021. Unelected public health officials constantly revised their guidance, leading to repeating something that was 'true' a week ago could suddenly get an account suspended. The Administration's clumsy and heavy-handed attempts to keep up with the rapidly evolving information environment entailed by a global pandemic gave all Americans a stark reminder of why the First Amendment was listed first. These documents reveal how Facebook, on the heels of extreme pressure from the Biden-Harris White House to remove specific posts, responded: Facebook created a portal so that government officials could submit links for removal from Facebook; each censorship request generated a ticket number so the government could track if Facebook complied with its censorship demands; Facebook explained to the CDC precisely what it needed in order to censor certain narratives within the bounds of its 'community standards'; exposed the United Kingdom's influence on the Biden-Harris Administration's censorship policy, and Zuckerberg's admission that Facebook only engaged in censorship after extreme pressure from the Biden-Harris White House." In January 2025, Zuckerberg committed to removing fact-checkers from Facebook and is instead implementing Community Notes like what X has (which still employs censorship, except totally under-handedly like the cowards they are). I trust Zuckerberg about as far as I can throw him but that might just be me. Gestapo. (reclaimthenet.org/heres-everything-you-still-cant-say-on-free-speech-meta-platforms)

There’s one topic I’ve been avoiding adding and that is Sovereign Citizen. The biggest reason is that I don’t *fully* understand it and I don’t like to add anything I don’t get. The second reason I’ve been avoiding this topic is that if you don’t know what you are doing then you can get into big trouble when it comes to not paying taxes, and the last thing I want is to be an accomplice to your suffering. However, Sovereign Citizen can be done correctly if you know your stuff, and moreover, there are some specific scenarios where you can apply these concepts usefully without having to go all-out. So I post this next entry with a huge warning of caution. Do your own research and if you aren’t 100% confident then just don’t do it.

I’ve seen dozens of other platforms teaching this subject but none of them impressed me, except for this one. This one is comprehensive and feels earnest. Our politicians found it necessary to pass forced, arbitrary quarantine laws, where **the state can legally kidnap you because some unelected official decides you *may have been exposed to an infectious pathogen***. About Me

I'm a homeschooling mom of 3 in Henderson, NV, and the wife of an entrepreneur for 15 years. I grew up in the 80's & 90's, mostly in the Midwest. I went to 19 different schools throughout the years, never becoming attached to any person or any place. I am remarkably confident about not following the crowd.

I would send you to my social media if I had any (other than my telegram page), but I'm a true rebel – they kicked me off years ago and I never created new accounts! Honestly, I recommend it. I may or may not decide to create a companion Facebook page for this project at some point - only because, as motivational speaker Andy Elliott says, if I'm not using social media to promote myself then I'm an idiot, because it's *free*. What do you think? I have also been thinking about making a Substack to complement this project, because I always want to write about the negative things I find out about companies, but that's not what this book is all about. So keep your eyes out for those in case time falls into my lap one day.

Before the pandemic I was fully indoctrinated, though I always felt like something was off. Then the lockdowns happened. I was cool for about 2 weeks, even trying to set a good example by wearing a mask before they were forced on our bodies. But as the months dragged on, I became increasingly horrified by the government's and everyone else's behavior. In June of 2020, an old friend from high school sent me a meme from a truther account, and by mid July the veil of lies had been lifted.

As my new online friends told me more about the parallels between what was happening to us and what the Bible says, and as I learned more about who the parasite class are and what they do, the fact that *evil truly does exist* began to coalesce. The Lord revealed himself to me on July 15, 2020. In February of 2022, I became a Born Again Christian, and believe in the true gospel of Jesus Christ. Amen!

I am obsessed with making the next Exit the Matrix edition even better than the one before – it's a passion of mine! We each have to do our part in the battle against good and evil, and I decided this is one of mine. It also alleviates my anxiety to know I'm doing something to fight back! 😊 No victim mentalities allowed.

Thank you for reading, please utilize, enjoy, and share!

Enjoy this photo of what I *had* to go to the store during The Plandemic! I simply did not want to suffocate in a mask, but, a perk to this was that it enraged the right people, who decided they were being mocked.

Support My Work

I print up and hand out Exit the Matrix business cards at events, and leave them on cars that have crosses and American flags, and give them to people I see in person wearing patriotic gear. I would also like to have a web designer make this a live, interactive book on my website. I have 50 pages' worth of new web addresses to verify which could be added. And I have a couple other related projects I wish I could launch into.
